PROFILE

Programmer on Unity and Godot game jam and hackathon projects in C# and GDScript, with over two and a half years testing 10+ console game titles at Altagram for PlayStation, Xbox and Nintendo certification. Computer Science Technology student at Collège LaSalle (90% average).

SKILLS

Engines and languages: Unity, Godot, C#, GDScript, C++, Python
Game programming: gameplay programming, UI programming, hardware integration (USB serial, sockets), rapid prototyping
QA and tools: game testing, console certification, regression testing, bug tracking, Jira, GitHub

EDUCATION

DEC, Computer Science Technology (420.B0) Aug 2024 – Aug 2027 (expected)
Collège LaSalle, 90% average Montreal, QC

EXPERIENCE

Functional and Linguistic QA Tester Feb 2024 – Oct 2026
Altagram Canada Montreal, QC

- Tested 10+ video game titles for PlayStation, Xbox and Nintendo certification and release, in functional and linguistic QA.
- Tested ASKA, a village simulator and survival game on Steam, for over 2 months; credited in the game.
- Isolated a bug only I had hit, once; colleagues reproduced it from my steps, and I ran the regression check after the fix.
- Logged bugs in Excel in Jira format for a first pass, then submitted them to Jira.

College-Level Programming Tutor Feb 2022 – Present
Freelance Montreal, QC

- Gave 50+ hours of programming tutoring to about 20 international students in C#, Java, Python, C and C++.

PROJECTS

My House Is Built for You, Gamerella 2025 game jam (team of 4) Nov 2025

- Programmer on a Unity game in C#, playable on itch.io (38 of 121 commits).
- Wrote the player interaction, dialogue, task menu, UI manager and end-of-day judgement scripts.
- Worked on the points system that scores each day's choices.

Clinic Management (team of 3) Nov 2025 – Dec 2025

- Built the Appointment stack and all the UI of a C# Windows Forms app; perfect grade and best-looking app in the class batch.

Operation Redacted, Project Icarus hackathon (team) Oct 2024

- Built a Python bridge that reads a custom controller over USB serial and forwards its input to a Godot game through a local socket.
- Wrote about 640 lines of GDScript for character movement, the camera and input handling (21 of 34 commits).

Other game jams and hackathons

- Programmer on a team of 4 at the MLH Game Jam, building a game from scratch.
- Led rapid prototyping in C++ and C#, with version control on GitHub, to deliver playable demos under tight deadlines.

VOLUNTEERING

Represented Collège LaSalle at the Montreal International Game Summit (MIGS).
